

The growth brain for restaurants on delivery apps

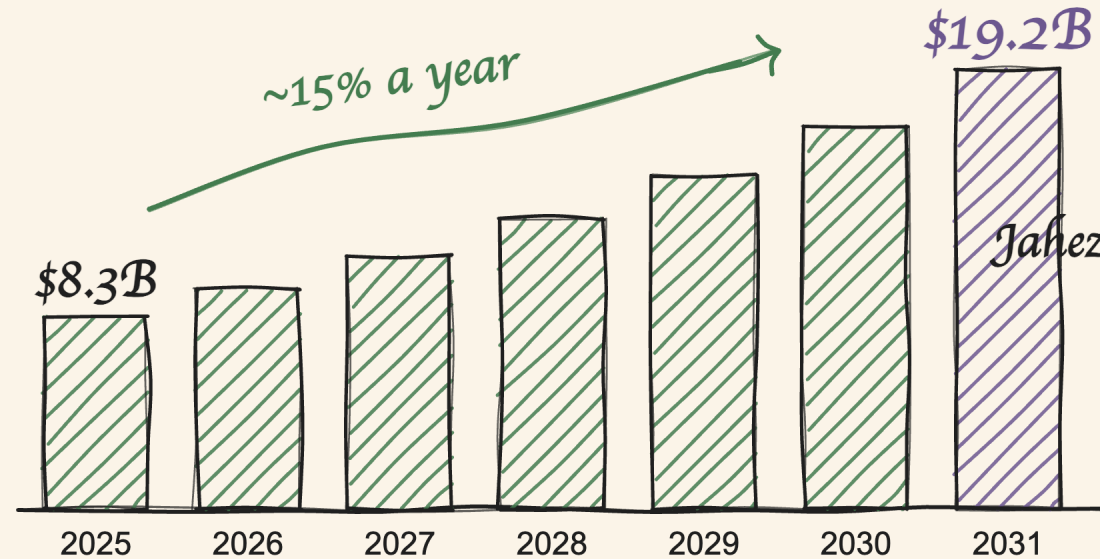

Agency today. AI product in build. Riyadh first.

Sanabil Accelerator by Orbit Ventures · Batch 5 · *first pilot client, Segment C

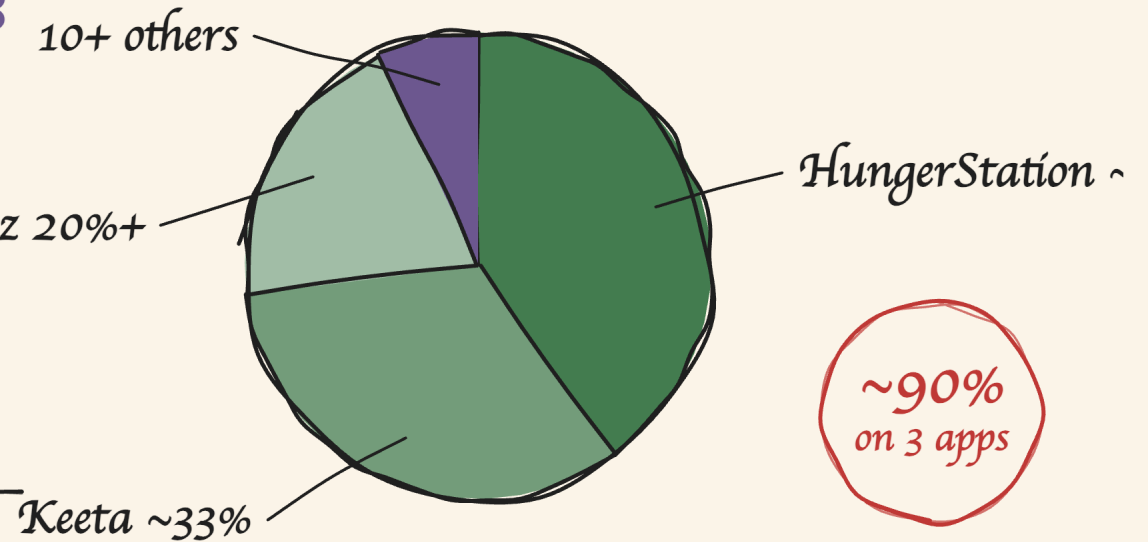

Delivery apps are no longer optional for Saudi restaurants

KSA delivery-app market, USD bn

Who holds the orders (Nov 2025)

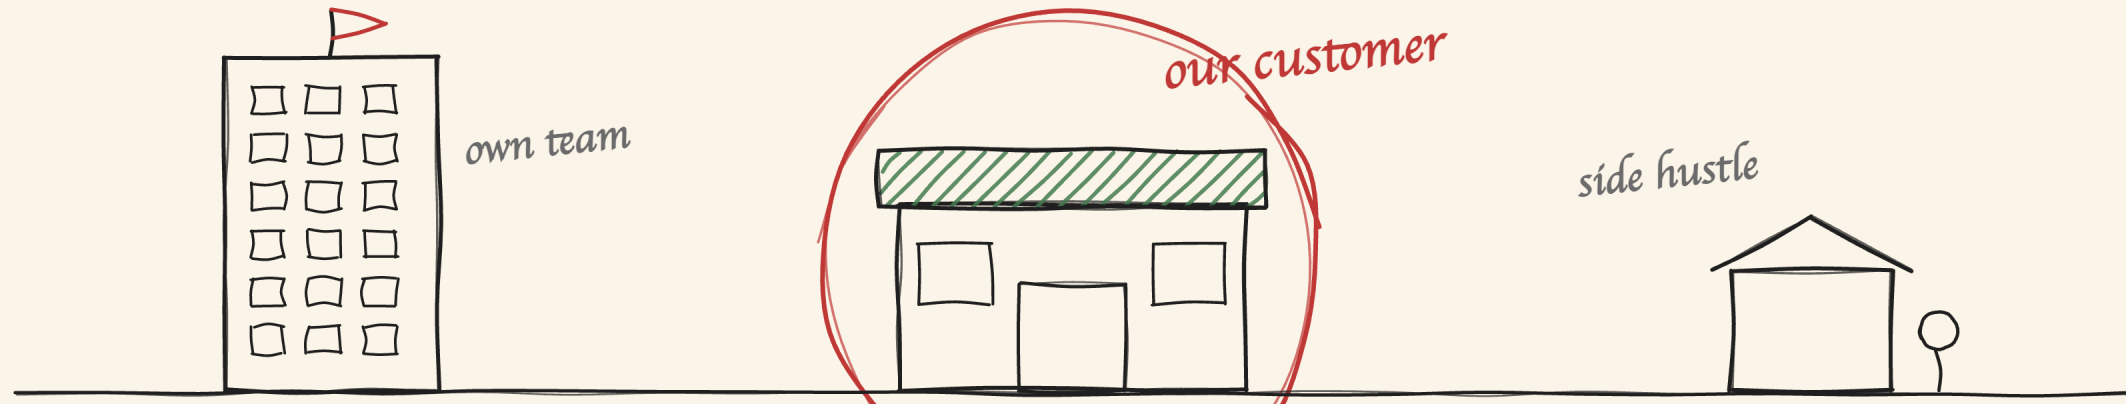

Riyadh alone is **~45% of national delivery orders**, and delivery is roughly **a third** of the restaurant spend that can be delivered.

Sources: Mordor Intelligence, Ken Research (2025-26); app shares Nov 2025. "A third" = Yamdy estimate: delivery ÷ foodservice (~\$30B) excl. hotels, catering, institutional.

WHO FEELS IT

Every restaurant fights the apps. Only some can pay to fix it.

A • Large chains

~1,290 brands

International and big local chains with an in-house team of 1-10.

Enterprise tier, from late 2027

B • Established brands

~5,150 brands

20-100 HQ staff, ~4-5 branches. One stretched generalist, or nobody.

Our customer

C • Owner-run brands

~19,300 brands

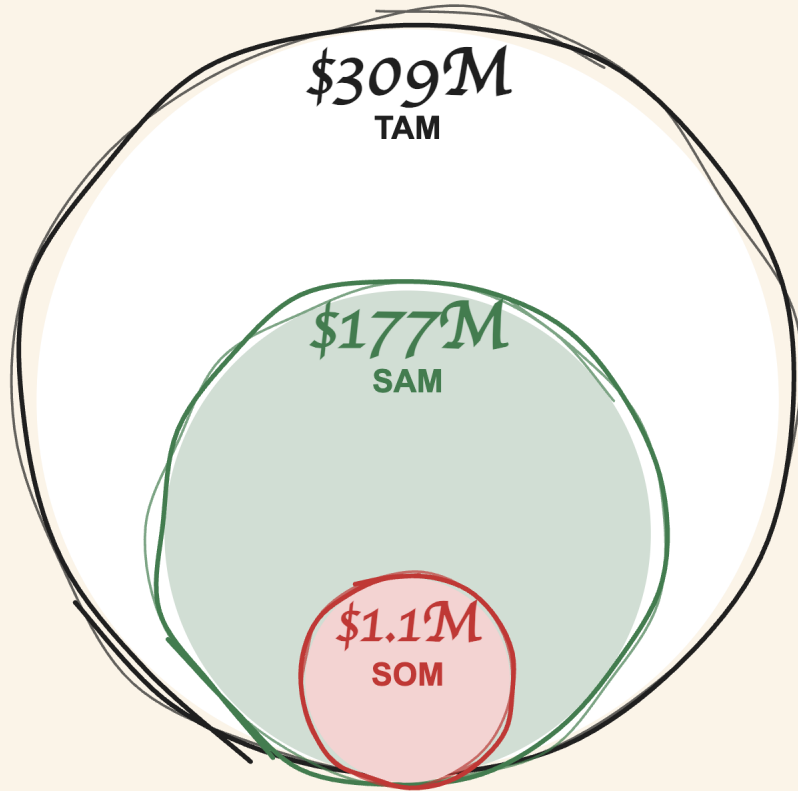

New, often a side business. Prices set once by the owner.

Feels the pain, rarely pays: Yamdy AI later

MARKET SIZE

80,500 outlets. 25,800 brands. 5,150 are ours to win.

TAM • \$309M

All ~25,800 KSA brands on a Yamdy product: enterprise tier for chains (~SAR 32K/mo), agency and self-serve.

SAM • \$177M

~5,150 Segment B brands on the agency at SAR 7K/mo, plus ~19,300 Segment C brands on Yamdy AI at SAR 1K/mo.

SOM 2027 • \$1.1M

50 active clients: about 2% of Riyadh's Segment B, before any city beyond Riyadh.

Why the AI multiplies it

Segment C is 3.7× larger than B and feels the pain most, but cannot pay agency prices.

Outlets: xmap.ai Saudi Arabia Restaurants & Cafés dataset (80,514). Brand counts derived from per-segment branch averages. Riyadh ≈ 45% of delivery orders (Q2 2025).

THE PROBLEM

Segment B runs its biggest channel on autopilot

Pricing set once

A flat markup nobody re-tests, leaking either margin or conversion.

Money never reconciled

Payouts, commissions and cancellations across 3+ apps go unchecked.

Promos and bundles guessed

No experiments, no benchmarks, no idea what works on which app.

Visibility sold by relationship

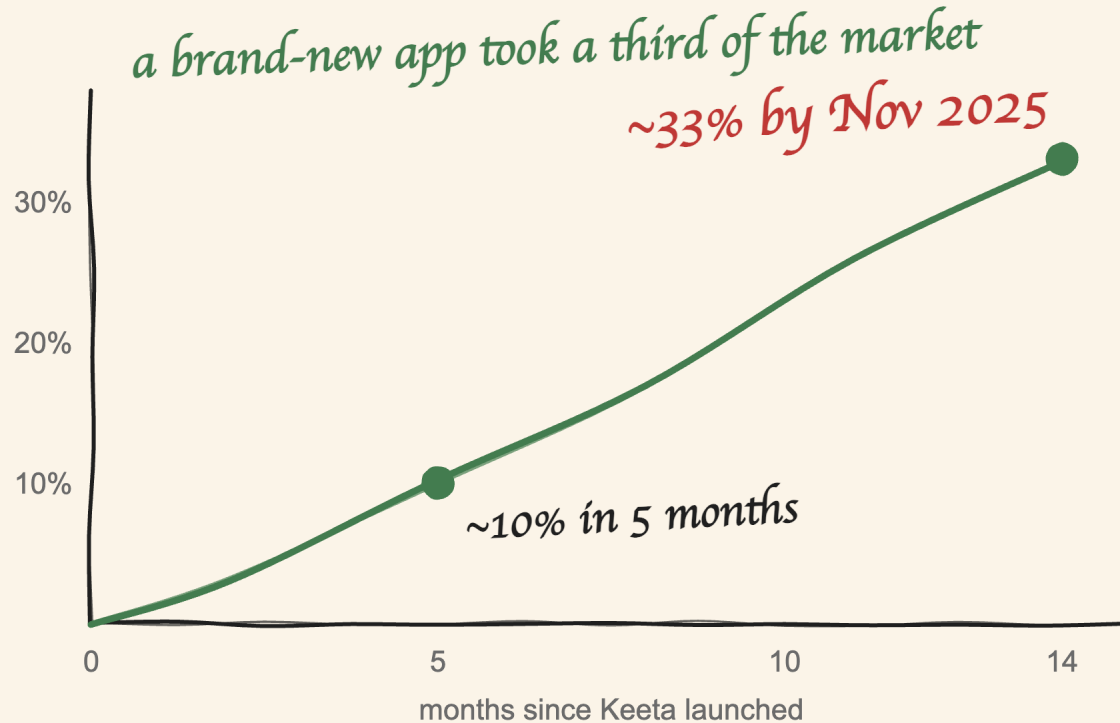

Top listings, pushes and homepage slots only via aggregator account managers.

A capable in-house channel manager costs SAR 10K+/month, and is still one person with one restaurant's data.

WHY NOW

The job got harder, and AI just made it cheap to do well

Harder

Three serious apps to juggle; pricing and promo decisions now change weekly.

Cheaper

AI makes daily analysis and experiments per restaurant affordable, work that needed a senior hire.

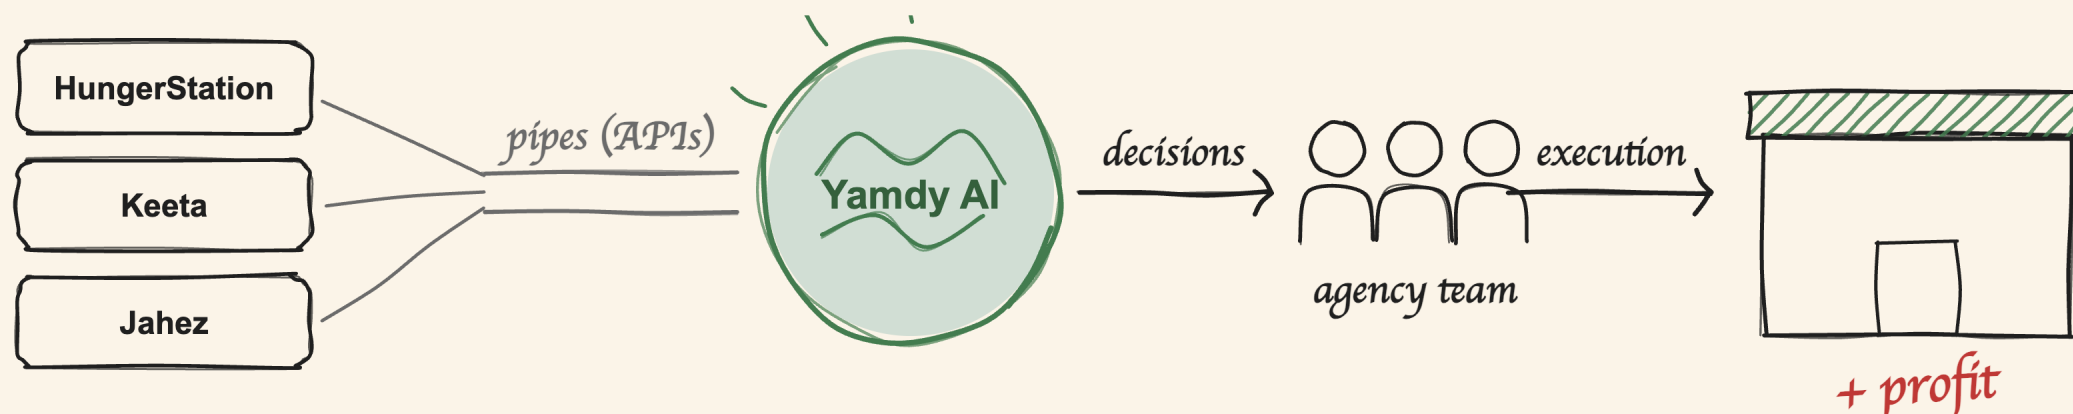

Accepted

Delivery-app agencies are a recognised category in KSA; restaurants already pay to outsource this.

Keeta share: Redseer (~10% within 5 months of launch); ~33% by Nov 2025. Curve between those points is illustrative.

THE SOLUTION

Not a pipe. A brain for your delivery channel.

LIVE • PAYING CLIENTS

Yamdy Agency

We run the channel: pricing, bundles, promos, menus, photography, aggregator account managers and reconciliation. Funded by revenue and our backer.

IN BUILD • THIS CHEQUE

Yamdy AI

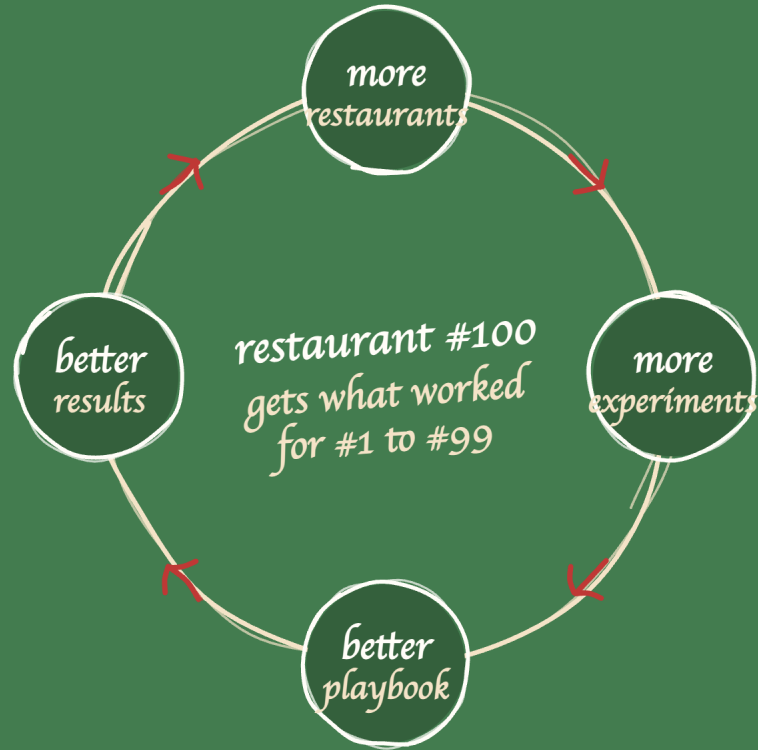

One dashboard reading every app. Draws on proven tactics, proposes experiments daily, runs them once the restaurant approves.

Year 1: Yamdy AI powers our own team. Then it launches self-serve, with the agency as the premium tier.

WHY IT'S HARD TO COPY

Three advantages that compound

01

Experiment velocity

We test across a portfolio at once. One restaurant runs maybe one experiment a month and cannot separate signal from noise.

02

Aggregator access

Ads, top listings, pushes and homepage slots have no API. They are sold through account managers, and our backer has years of those relationships.

03

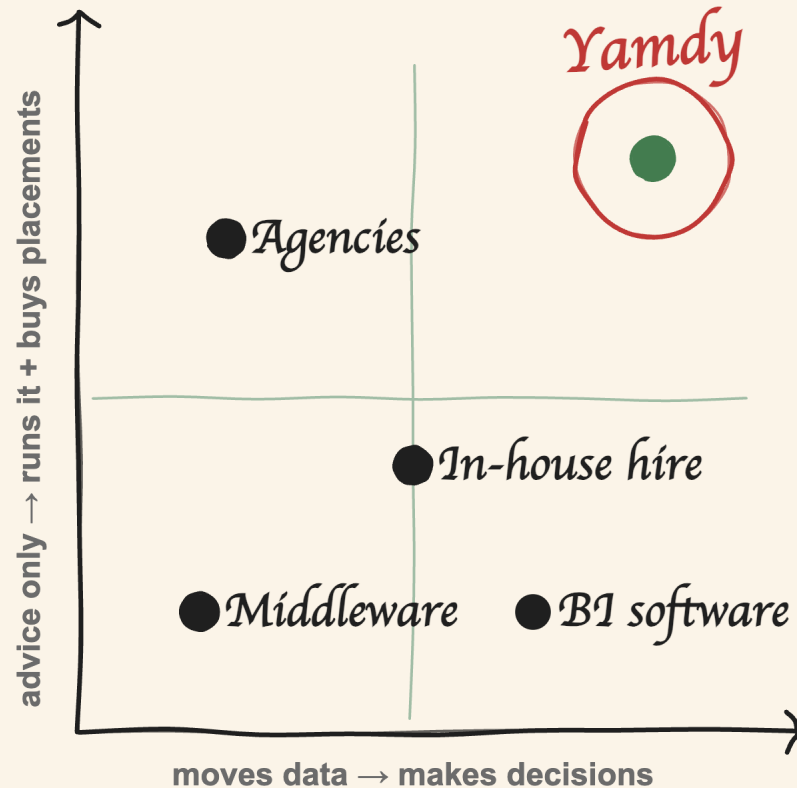

Built above the pipes

We plug into partner APIs and existing middleware instead of rebuilding them, and focus only on decisions.

COMPETITION

Software tells you what to do. We do it.

Middleware • Deliverect, Grubtech, UrbanPiper

Sync menus and orders. No pricing, promo or growth decisions.

BI software • GrowDash (UAE, UK; not in KSA)

Dashboards and recommendations for chains with their own teams. The restaurant still has to act.

Delivery-app agencies • e.g. Impact, Riyadh

Account managers and weekly reports. Report what happened; no experiments, so nothing compounds.

In-house hire • SAR 10K+/month

One restaurant's data, no benchmarks, no aggregator leverage.

Yamdy

Decisions, execution and aggregator access in one.

Early proof: +30% profit in one month

Bars show the relative change only.

How

Repriced the menu and built bundles that raised ticket size. First pilot, Segment C.

2 paying pilots, 1 active

SAR 5,000/month today, from one active client.

1 churn, 1 lesson

Segment C is too thin to learn fast, so we moved upmarket to Segment B.

Team in place

Full-time BD lead (5-6 years in market), marketing lead and delivery-apps manager.

A monthly subscription, priced below one hire

LIVE NOW · SEGMENT B

Yamdy Agency

SAR 5-10K / month

We run the delivery channel for you.
Average fee SAR 7K.

LATE 2027 · SEGMENT C

Yamdy AI self-serve

SAR 1K / month

You run it, with our AI. Opens
19,300 owner-run brands.

LATE 2027 · SEGMENT A

Enterprise

*~SAR 32K /
month*

Yamdy AI and aggregator access
for chains with their own teams.

WHAT A SAR 7K CLIENT GETS VS. ONE HIRE

Yamdy

Agency 3K

AI 2K

Creative 2K

One hire

SAR 10K+ · one person, one restaurant's data

HOW EACH CLIENT GROWS

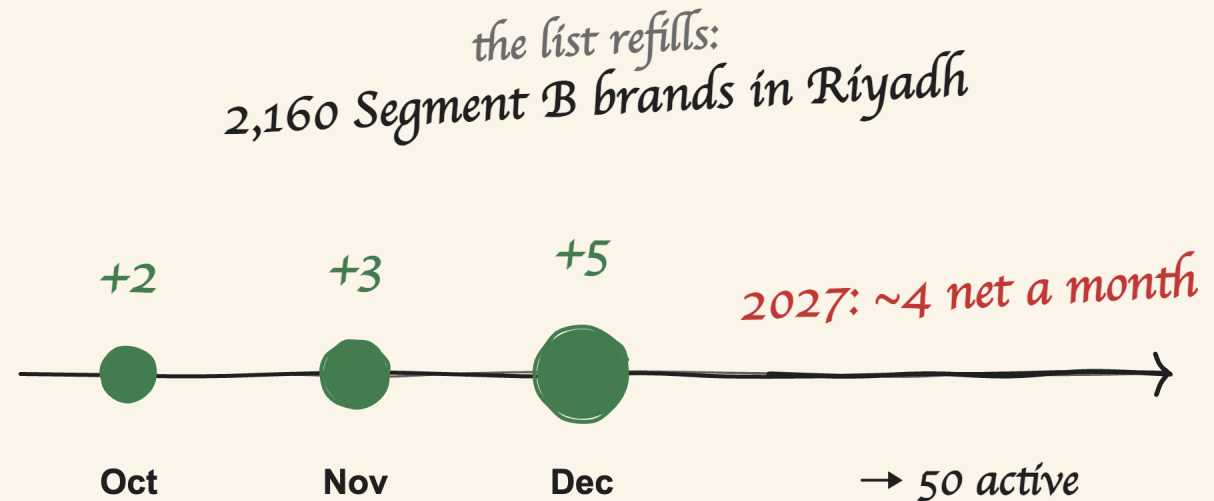

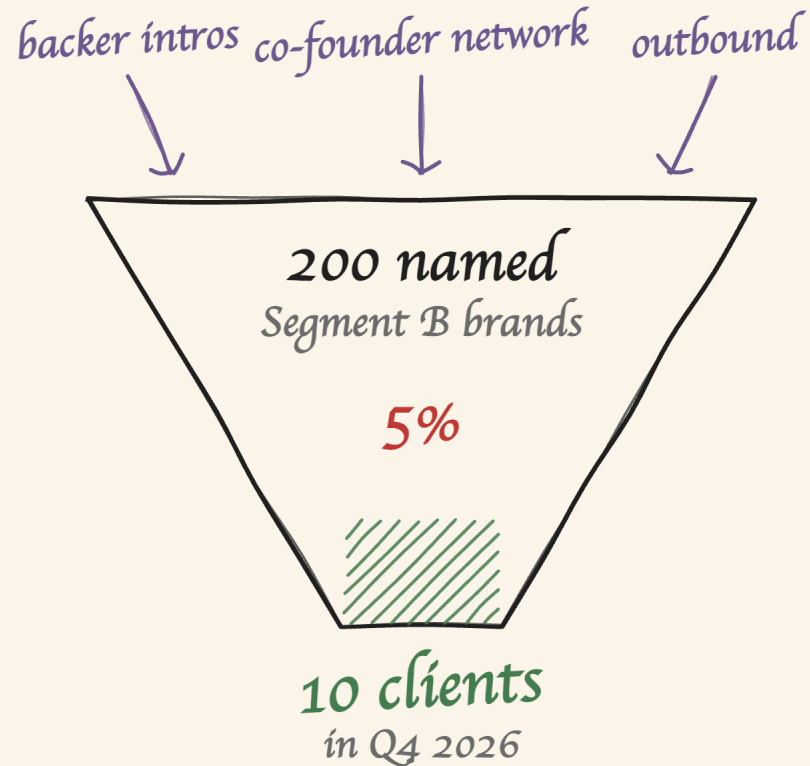

Land at SAR 5K a month

Expand to SAR 8-10K once results show

Next: management fees on ad spend and a share of growth

30% cheaper, and you get a team plus the AI.

We hunt Segment B from a named list

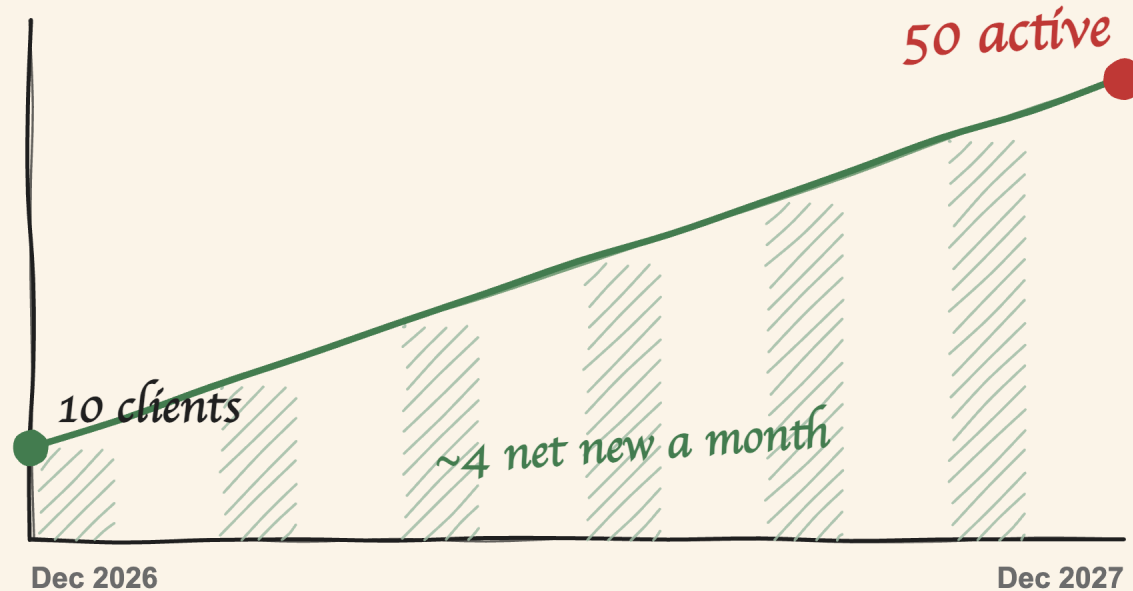

Channels: referrals from our backer's account managers, our BD co-founder's network, and outbound led by our full-time BD lead.

PROJECTIONS

50 active clients and \$1.12M ARR by December 2027

EXIT ARR, DEC 2027

\$1.12M

SAR 4.2M · SAR 350K MRR · SAR 7K per client

Is 50 reachable?

0% monthly churn	3.3 new/mo
3% monthly churn	4.2 new/mo
5% monthly churn	4.9 new/mo

Agency revenue only; Yamdy AI self-serve is upside not counted. Founders unsalaried. SAR 3.75 = USD 1.

TEAM

Operators who've run F&B growth in KSA

Ahmad Alerieny
Founder

Fourth-time founder, CS engineer. Two years in Riyadh as right hand to the CEO of an F&B platform, with restaurants daily.

Ahmed Samy
Co-founder • BD

13 years in Saudi F&B. Early team at Talabat, then HungerStation. Deep aggregator and restaurant relationships.

Ahmad Agha
Co-founder • Product & Tech

12+ years in product and engineering, CS, MBA in progress. CPTO at a startup with a partial exit.

Sherif Elgazzar
Co-founder • Marketing

15+ years in marketing, MBA, in KSA since 2024. Runs the creative engine that makes experiments ship fast.

EXECUTING TODAY

3 full-time hires: BD lead, marketing lead, delivery-apps manager. Founders unsalaried.

WHAT THE CHEQUE CHANGES

Agha goes full-time on Yamdy AI first; each co-founder follows as revenue earns it.

OUR BACKER

Backed by an established Saudi F&B platform

COMMITTED FUNDING

SAR 100K

Released against agreed KPIs,
dedicated to growing the agency.

Separate from the Orbit cheque, which
builds Yamdy AI.

BEYOND THE MONEY

Client access

Introductions to restaurant brands already working with our backer: warm leads for our Segment B pipeline.

Aggregator relationships

Years of account-manager relationships with the delivery apps, where placements and promotions are actually sold.

Aligned incentives

Our backer grows when restaurants grow on every channel. Named on request.

THE ASK

One cheque, one job: put Yamdy AI on paying accounts

WE ASK FOR

**\$80-
100K**

Orbit's fixed cheque. No round, no valuation talk.

The agency runs on revenue and our backer. This buys product, not runway.

WHAT IT FUNDS · ~12 MONTHS

Agha, full-time on Yamdy AI

The majority of the cheque. Our technical co-founder leaves his CPTO role.

Engineering and integrations

Support engineering and connections to HungerStation, Keeta and Jahez.

Built on live data

Real clients, real menus, real experiments from day one.

WHAT IT DELIVERS

Dec 2026

10 agency clients

Demo Day

Yamdy AI live on paying accounts

Dec 2027

50 clients · \$1.12M ARR

2028

Segments C and A, then abroad

Thank you
